

**Decree Draft modifying and complementing the Decree no. 2.10.421 of 20 Shawwal 1431 (September 29, 2010) promulgated to implement the provisions of the law no. 52.05 about Highway Code related to vehicles.**

## **Memo**

In the context of improving the road safety and prevent the traffic accidents this Decree draft aims the adoption of a set of embedded safety equipments as well as the mechanisms that allow automatically monitoring of the driver's behavior while driving.

In the framework of the free exchange with the United States and the policy of attracting foreign capitals, a set of provisions are implemented to permit an easy market entry for the Canadian and US vehicles to the Moroccan market.

Thus, this draft decree aims to complement the Articles 40, 43, 46, 50, 55, 67, 73, 82 and 85 related to lighting and signaling devices, audible and optical alarms, platelets and safety devices, as well as to modify the Article no. 70 related to the devices that insure the control of the speed and time of driving.

These devices are as follows:

- The Global Positioning System (GPS);
- Breath Alcohol Ignition Interlock Device (BAIID);
- Remotesecurity camera to monitor the driver's behavior while driving;
- Anti-Sleep Driving Alarm;
- Airbags;
- Anti-lock braking system (ABS);
- Electronic Brakeforce Distribution(EBD, EBV or equivalent);
- Anti-Slip Regulation(ASR);
- Electronic stability control(ESP, ESCor equivalent).
