

Regarding the Moroccan regulation convergence to the European one, This project has elaborated in order to repeal and replace the decree n° 2-05-1399 that has emerged in laying down the conditions of granting approval to the companies charged of ground handling services:

This decree aims at:

- Creating a user's committee in each airport.
- Reviewing the process of selecting the ground handling services providers, when their number could have been limited.
- Adapting the concept of self-assistance.
- Establishing an objective procedure to limit the number of carriers seeking authorization in order to exercise the self-assistance in a particular airport.
- Establishing a new provision based on a procedure to select authorized service providers to provide ground handling services.
- Equitable spreading of the airport area reserved for facilities between differential operators.
- Deleting the period of validity of the authorization.

In fact, the adoption of the draft will allow to enhance handling activity and strengthen the economic regulation of air transport in Morocco, and so establish a healthy and competitive environment.
